))) CSES ADVANCE RELEASE - WHAT USERS NEED TO KNOW

This dataset and all accompanying documentation is the "Second Advance Release" of CSES Module 6 (2021-2026).

An Advance Release is a preliminary version of this CSES product. It thus lacks some of the checking, cleaning, processing, documentation, data, and variables that we anticipate in the Full Release of this product. The product is still in development, and data will be added gradually. Many election studies and variables that will eventually be present in the CSES

Module 6 Full Release are unavailable in this file. Advance Releases are provided as a service to the CSES user community for those analysts who find it valuable to work with preliminary versions of the dataset.

Users should anticipate future changes and improvements to the naming, data, and documentation of variables and election studies that appear in an advanced release file. If users wish to re-use their programming syntax/code on a future release of this product, we recommend that the code be written to accommodate these potential changes.

Users of the Advance Release may also wish to monitor the errata for CSES Module 6 on the CSES website to check for known errors that may impact their analyses. To view errata for CSES Module 6, go to Data Download on the CSES website, navigate to the CSES Module 6 download page, and click on the Errata link in the white box to the right of the page.

We hope that until the Full Release of CSES Module 6 is available, users will find this and future CSES Module 6 Advance Releases helpful in their work.

))) CSES DESIGN, DOCUMENTATION, & WEIGHTS - ADVICE TO USERS

We recommend that researchers become familiar with the CSES design, units of analysis, documentation, and dataset weights before beginning their investigations. For instance, while the set of respondents appearing within each election study represents their respective nations, the group of nations that appear within CSES is not a random sample of countries worldwide. Furthermore, while many election studies include 1,000 or so respondents, other election studies may consist of over 10,000 respondents. Some nations will have studies of more than one election in a CSES module, and occasionally there will be two independent studies of a single election. Last, some election studies include over samples of specific sub-populations or would otherwise benefit from use of the included weight variables. We hope you find our website and documentation useful as you proceed with your work, and welcome any questions or suggestions you have.

))) OVERVIEW OF "CODEBOOK PART 3: PARTIES & LEADERS"

Part 3 of the CSES Codebook identifies the parties/coalitions participating during a polity's national election and/or those participating in the polity's previous national election. It also details the leaders of parties/coalitions and/or Presidential candidates (where applicable) for the most important parties/coalitions.

Part 3 also lists the party identifiers in other comparative projects, namely the Manifesto Research on Political Representation (MARPOR, formerly the Comparative Manifesto Project) and Party Facts. This will allow easy data bridging between CSES and these other projects.

))) HOW TO NAVIGATE THE CSES MODULE 6 CODEBOOK

In the CSES MODULE 6 dataset, all variables begin with the letter "F" (F being the sixth letter of the English alphabet and thus signifying MODULE 6).

The CSES Codebook is especially extensive and users are advised that the best way to navigate it is electronically. It is a .txt format which allows it to be accessed via a variety of programs.

The CSES Codebook can be navigated quickly in the electronic files, with the following commands allowing for quick searching:

))) = Section Header

>>> = Sub-section Header 1

<<<> = Sub-section Header 2

+++ = Tables

CSES QUESTION CLASSIFICATION = For survey level variables only, CSES Question Classification details whether the variable is part of the CSES Core component, which are questions asked repeatedly in CSES Modules, whether a variable is part of the CSES Module Theme component, which are questions specific to the Module Theme under exploration and might not be included in CSES repeatedly, or whether a variable is a Derivative Variable, which is explained below.

VARIABLE NOTES = Notes for particular variables

ELECTION STUDY NOTES = Notes for a particular election study

DERIVATIVE VARIABLE = Highlights a variable derived from another variable or variables within the CSES.

POTENTIAL POLITY LEVEL BRIDGING IDENTIFIER =
 Highlights a variable that may be used for data bridging at polity level.

POTENTIAL REGIONAL LEVEL BRIDGING IDENTIFIER =
 Highlights a variable that may be used for data bridging at regional level.

POTENTIAL TIME BRIDGING IDENTIFIER =
 Highlights a variable that may be used for data bridging by time.

POTENTIAL PARTY/COALITION LEVEL BRIDGING IDENTIFIER = Highlights a variable that may be used for data bridging at party/coalition level.

POTENTIAL CSES PRODUCT BRIDGING IDENTIFIER = Highlights a variable that may be used for data bridging with other CSES products.

For further details on the CSES MODULE 6 documentation, users are advised to consult Part 1 of the CSES Codebook.

))) CSES MODULE 6 CODING OF PARTIES/COALITIONS & LEADERS

CSES codes parties/coalitions in its dataset numerically and alphabetically. Below we provide explanations of both of these coding schemes. The details of each party/coalition/leader classification are available in Part 3 of the Codebook.

<<>> CSES NUMERICAL PARTY/COALITION CODING

Each party is assigned a unique numerical code which consists of two components and six digits in total:

- the first three digits indicate the numerical country UN code
- the latter three digits indicate the numerical party code within the given election study.

All parties/coalitions or Presidential candidates, where applicable, participating in the election or the previous election receive a numerical code. These codes are used to identify the following:

- who a respondent voted for in the current election (variables F3011_).
- who the respondent voted for in the previous election (variables F3016_).
- the respondent's party identification (variable F3023_3).

The numeric coding is also used to identify macro level information about the parties/coalitions, namely:

- numeric party code identifiers for relational data (variables F5000_)
- numeric party code identifiers for leaders' party affiliations (variables F5000_L_)
- which party/coalition held the Presidency before and after the elections (variable F5019_1 and F5019_2).
- which party/coalition held the Prime Ministership before and after the elections (variable F5020_1 and F5020_2).
- which party/coalition held the ministry of finance before and after the elections (variable F5023_1 and F5023_2).
- which party/coalition held the foreign ministry before and after the elections (variable F5023_3 and F5023_4).
- which party/coalition held the health ministry before and after the elections (variable F5023_5 and F5023_6).

Numerical codes assigned to parties/coalitions are consistent for the current and previous election.

<<>> CSES ALPHABETICAL PARTY/COALITION CODING

Parties A through F are the six most popular parties/coalitions, ordered in descending order of their share of the popular vote in the parliamentary election (unless otherwise stated). Thus Party A is the party/coalition that received the most votes in the election, party B the second most

votes, etc...

Parties/coalitions who achieve at least 1% of the vote nationally are eligible for an alphabetical A-F assignment. In polities with multiple electoral tiers and where one vote is cast, parties are ordered according to their vote share in tier 1 (the lowest tier), unless otherwise stated. In polities where voters have two votes (i.e.: a constituency and a list vote) simultaneously, for example Germany, parties are ordered by the national share of the party list vote (tier 2) unless stated otherwise.

Parties G, H, and I are supplemental parties. They may, but do not have to, accord with how parties A-F are ordered, that is ordered on the popular share of the vote in a country. More often, they are codified in no particular order. These parties are voluntarily provided by each country's election study and often reflect important or notable parties within a country. They may also include data about individual parties within a coalition, where data about the coalition and the individual parties, or some of these parties that make it up, are provided.

These codes are used to identify the following in the micro component of the CSES dataset:

- Respondent's likeability of the party/coalition (variable F3018).
- Respondent's left-right placement of the party/coalition (variable F3020).
- Respondent's placement of the party/coalition on an alternative scale, if applicable (variable F3021).

These alphabetical codes are used to identify district and macro level information about these said parties/coalitions, namely:

- The said party/coalition's vote share in the respondent's electoral district (variable F4004).
- the said party/coalition's share of the seats in the election in the respondent's electoral district (variable F4005).
- the said party/coalition's share of the vote in the election (variables F5001, F5003, F5005, and F5006).
- the said party/coalition's share of the seats in the election (variables F5002 and F5004).
- the said party/coalition's share of cabinet portfolios before and after the election (variables F5021 and F5022).
- expert judgments by the national Collaborators of the said party/coalition's ideological family (variable F5028).
- expert judgments by the national Collaborators of the said party/coalition's left-right placement (variable F5029).
- expert judgments by the national Collaborators of the said party/coalition's placement on an alternative scale, if applicable (variable F5030).
- expert judgments by the national Collaborators of the said party/coalition's level of populism (variable F5031).
- The said party/coalition's Manifesto Research on Political Representation (MARPOR/CMP) Identifier (variable F5200).
- The said party/coalition's Parliaments and Government Database (ParlGov) Identifier (variable F5201).
- The said party/coalition's Chapel Hill Expert Survey (CHES) Identifier (variable F5202).
- The said party/coalition's Party Facts Identifier (variable F5203).

<<>> CSES ALPHABETICAL LEADER CODING

Leaders A through F tend to be the leaders of the six most popular parties/coalitions or the Presidential candidates of these parties. They correspond to parties A-F (i.e.: Leader A will be related to Party A in some way, Leader B will be related to Party B, etc.).

Leaders G, H, and I are supplemental leaders. They may be related to parties G, H, I but they do not have to be. These leaders are voluntarily provided by each politics election study and often include data about additional personalities of interest. For example, in a parliamentary system, data about a President might be provided, even if the Presidency is not being contested. On many occasions, slots Leader G, H, and I will include additional data for parties/coalitions that have multiple leaders. These codes are used to identify the following in the micro and macro components of the CSES dataset:

- Respondent's likeability of the leader/personality in question (variable F3019).
- the said leader/personality's biological sex (F5000_L_ABS-IBS).

))) PARTIES AND LEADER CLASSIFICATIONS FOR CSES MODULE 6 BY POLITY & ELECTION YEAR

All parties/coalitions or Presidential candidates, where applicable, participating in the election or the previous election receive a numerical code. Alphabetical codes are assigned to select parties and leaders (see above description on how parties/coalitions and leaders are coded by the CSES).

The party/coalition and leaders are listed in numerical order. CSES provides the name of the party/coalition in the original language, the English version of the party/coalition name, and the party abbreviation, where available. Leaders are only listed for parties where we have accompanying leader likeability data available. Politics are listed in alphabetical order. The party/coalition and leaders are listed in numerical order.

Users are advised to pay particular attention to ELECTION STUDY NOTES listed below each polity's party and leader list for additional information regarding data availability and deviations.

| ELECTION STUDY NOTES - BRAZIL (2022): PARTIES AND LEADERS

| LEADERS A-D were the Presidential candidates of their respective
 | parties or coalitions in the 2022 Presidential election.

| LEADER B, Jair Bolsonaro, was incumbent President and contested
 | the 2022 election for the Liberal Party (LP, PARTY B). He joined
 | the LP in 2021. However, researchers are advised that Bolsonaro
 | contested the previous 2018 elections as a member of the Social
 | Liberal Party (PSL, NUMERICAL CODE 076033), a party he left in
 | 2019.

| PARTY E, Brazil Union (UNIAO, NUMERICAL CODE 076005) was founded

| ELECTION STUDY NOTES - POLAND (2023): PARTIES & LEADERS

| Five alliances formed in the 2023 Polish lower house election.
 | Alliances are listed below and the numerical classification of
 | alliances are arbitrary and denoted by CSES for the ease of
 | users. Where applicable, an * indicates the dominant member(s)
 | of the alliance.

| ALLIANCE 1 (United Right, ZP - NUMERICAL CODE 616001) with the
 | following parties contesting as part of this alliance:

- | - Law and Justice* (PiS), PARTY A.
- | - Sovereign Poland (SP), PARTY G, NUMERICAL CODE 616007.
- | - The Republicans.
- | - Kukiz'15.

| For variables F3011_LH_PL, F3011_UH_DC_, and F3016_LH_PL, the
 | numeric code 616001 refers to the United Right Alliance (ZP).

| For variable F3016_PR_2, i.e., vote in the previous 2020
 | Presidential election, code 616001 refers to voters for PiS'
 | candidate and incumbent President Andrzej Duda (LEADER G).

| For variable F3023_3, code 616001 refers to Law and Justice
 | (PiS, PARTY A), which was the dominant member of the alliance.

ALLIANCE 1 (United Right) also contested in the previous 2019 legislative election. In this past contest (variable F3016_LH_PL), the alliance had a slightly different composition, and was supported by Agreement (NUMERICAL CODE 616014), Freedom and Solidarity (WiS) and Piast Party. However, Kukiz'15, Renew PR and Polish Affairs (PS) were not part of United Right in 2019.

ALLIANCE 2 (Civic Coalition, KO - NUMERICAL CODE 616002) with the following parties contesting as part of this alliance:

- Civic Platform* (PO), PARTY B.
- Modern (Nowo), NUMERICAL CODE 616011.
- Polish Initiative (iPL).
- Greens.
- AGROunion.
- Good Movement.

For variables F3011_LH_PL and F3016_LH_PL, the numeric party code 616002 refers to the Civic Coalition (KO) alliance.

For variable F3016_PR_2, i.e., vote in the previous 2020 Presidential election, code 616002 refers to voters for PO's Presidential candidate Rafal Trzaskowski (LEADER I).

For variable F3023_3, code 616002 combines answers referring to either the Civic Coalition, or Civic Platform (PO, PARTY B), which was the dominant member of the alliance.

ALLIANCE 2 (Civic Coalition) also contested in the previous 2019 legislative election. In this past contest (variable F3016_LH_PL), the alliance had a slightly different composition, and was supported by the Silesian Autonomy Movement (RAS) and Social Democracy of Poland (SDPL). However, AGROunia, Good Movement, and Yes! For Poland were not part of the Civic Coalition in 2019.

ALLIANCE 3 (Third Way, TD - NUMERICAL CODE 616003) with the following parties contesting as part of this alliance:

- Szymon Holownia's Poland 2050 (PL2050), PARTY C.
- Polish People's Party (PSL), PARTY E, NUMERICAL CODE 616005.
- Agreement, NUMERICAL CODE 616014.
- Union of European Democrats (UED).
- Center for Poland (CdPL).

For variable F3011_LH_PL, the numeric party code 616003 refers to the Third Way (TD) alliance.

For variable F3023_3, code 616003 combines answers referring to either Third Way, or Poland 2050 (PARTY C), one of the dominant members of the alliance.

ALLIANCE 4 (The Left - NUMERICAL CODE 616004) with the following parties contesting as part of this alliance:

- New Left (NL), PARTY D.
- Left Together (Razem), PARTY H, NUMERICAL CODE 616008.
- Polish Socialist Party (PPS).
- Labor Union (UP).
- Social Democracy of Poland (SDPL).

| - Freedom and Equality (WiR).
 | For variables F3011_LH_PL and F3016_LH_PL, the numeric party
 | code 616004 refers to The Left alliance.
 | For variable F3023_3, these data refer to New Left (NL, PARTY D)
 | only, which was the dominant member of the alliance.

| ALLIANCE 4 (The Left) also contested in the previous 2019
 | legislative election. In this past contest (variable
 | F3016_LH_PL), the alliance had a slightly different composition,
 | and was supported by Your Movement (TR). However, Labor Union
 | (UP), Social Democracy of Poland (SDPL), and Freedom and
 | Equality (WiR) were not part of the Left in 2019.

| ALLIANCE 5 (Party I, Confederation Liberty and Independence
 | Konfederacja - NUMERICAL CODE 616006) with the
 | following parties contesting as part of this alliance:
 | - New Hope (NN), NUMERICAL CODE 616012.
 | - Confederation of the Polish Crown (KKP), NUMERICAL CODE
 | 616013.
 | - National Movement (RN).
 | - Real Europe Movement - Europa Christi (RPE).
 | - Real Politics Union (UPR).
 | - Right Wing of the Republic.
 | To circumvent the higher electoral threshold applicable to
 | electoral coalitions, Konfederacja registered as a party rather
 | than alliance for the 2023 election.

| ALLIANCE 5 (Konfederacja) also contested in the previous 2019
 | legislative election. In this past contest (variable
 | F3016_LH_PL), the alliance had a slightly different composition,
 | and was supported by Union of Christian Families (ZchR), Party
 | of Drivers, and National League (LN). However, Real Europe
 | Movement (RPE), Real Politics Union (UPR), and Right Wing of the
 | Republic were not part of Konfederacja in 2019.

| PARTY D (New Left, NL) was founded in 2021 as a merger of the
 | Democratic Left Alliance (SLD) and Spring (Wiosna).

| LEADER F (Sławomir Mentzen) was the chairman of New Hope (NN) at
 | the time of the 2023 election, the biggest member party of
 | Konfederacja (PARTY F, NUMERICAL CODE 616006).

| LEADER G (Mateusz Morawiecki, PiS) was incumbent Prime Minister
 | at the 2023 legislative election and contested for another term
 | in office.

| LEADER H (Andrzej Duda, PiS) and LEADER I (Rafał Trzaskowski,
 | PO) were the Presidential candidates of their respective parties
 | in the previous 2020 Presidential election.

| NUMERICAL CODE 616015. Polish Coalition was an alliance formed
 | for the previous 2019 election, with the following parties
 | contesting as part of this alliance:
 | - Polish People's Party (PSL), PARTY E, NUMERICAL CODE 616005.

```

| - Kukiz'15 (K'15).
| - Union of European Democrats (UED).
| - Alliance of Democrats (SD).
| - Silesians Together.
| - Poland Needs Us.
| - One-PL.
|
| NUMERICAL CODE 616099. Senate Pact 2023 was an electoral
| coalition formed for the 2023 upper house election. The alliance
| comprised member parties of the Civic Coalition (KO, NUMERICAL
| CODE 616002), Third Way (TD, NUMERICAL CODE 616003), and the
| Left (NUMERICAL CODE 616004) alliances, and Yes! For Poland
| (T!DPL). In each of the districts for the Senate election,
| constituent parties of Senate Pact 2023 nominated one joint
| candidate.

| ELECTION STUDY NOTES - SLOVAKIA (2023): PARTIES AND LEADERS
 |
 | Two alliances formed in the 2023 Slovak parliamentary
 | election. Alliances are listed below and the numerical
 | classification of alliances is arbitrary and denoted by CSES
 | for the ease of users. Where applicable, an * indicates the
 | dominant member(s) of the alliance.
 |
 | ALLIANCE 1 (OLaNO and Friends, NUMERICAL CODE 703004)

with the following parties contesting as part of this alliance:

- Ordinary People - Independent Personalities* (OLaNO), PARTY D.
- Independent candidates (NEKA).
- New Majority (NOVA).
- Free and Responsible.
- Pacivale Roma.
- Magyar Szivek and Christian Union.
- For the People (ZL), NUMERICAL CODE 703019.

For variable F3011_LH_PL and F3016_LH_PL, the numeric party code 703004 refers to the alliance. For variable F3023_3, these data refer to OLaNO (PARTY D) only, which was the dominant member of the alliance.

ALLIANCE 2 (PARTY I, Hungarian Alliance, MSSA - NUMERICAL CODE 703009) with the following parties contesting as part of this alliance:

- Hungarian Community Togetherness (MKS), NUMERICAL CODE 703020.
- Party of the Hungarian Community (SMK).

NUMERICAL CODE 703010: Democrats have been known as Together Civic Democracy (Spolu) from 2018 until 2023. In the 2023 election, the Democrats ran independently, so voters could vote only for this party. However, in the previous 2020 parliamentary election, the Democrats ran together in a coalition with 703002. Progressive Slovakia (PS). For variable F3016_LH_PL, it is not perfectly distinguishable whether voters voted for 703010. Democrats or 703002. Progressive Slovakia. Voters who indicated to have voted for this coalition in the last election have been recoded into 703002. as Progressive Slovakia was the dominant party. However, respondents could also have been voted for the Democrats. This has been considered when coding F3012_VS_1.

NUMERICAL CODE 703017: Justice emerged after a renaming process in May 2023 where the party was renamed from 99 Percent - Civic Voice to Justice. The party ran under the name and logo of Justice in the 2023 Slovak parliamentary election.

NUMERICAL CODE 703019: For the People (ZL) joined the 703004. OLaNO and Friends (PARTY D) alliance on July 02, 2023. In the previous parliamentary election in 2020, For the People ran independently, so voters could vote only for this party. Therefore, this numerical code is used in the variable F3016_LH_PL to identify respondents who voted for For the People in 2020.

NUMERICAL CODE 703020: Hungarian Community Togetherness (MKS) merged with 703009. Hungarian Alliance (PARTY I) before the 2023 parliamentary election. In the previous parliamentary election in 2020, Hungarian Community Togetherness ran independently, so voters could vote only for this party. Therefore, this numerical code is used in the variable F3016_LH_PL to identify respondents who voted for Hungarian Community Togetherness in 2020.

NUMERICAL CODE 703021: Good Choice (DV) merged with 703003.

| Voice - Social Democracy (PARTY C) before the 2023 parliamentary
 | election. In the previous parliamentary election in 2020, Good
 | Choice ran independently, so voters could vote only for this
 | party. Therefore, this numerical code is used in the variable
 | F3016_LH_PL to identify respondents who voted for Good Choice
 | in 2020.

 | Christian Democratic People's Party of Switzerland (CVP/PDC) and
 | the Conservative Democratic Party of Switzerland (BDP/PBD) on
 | January 01, 2021.

| PARTY H (Ticino League, Lega) is a regional electoral party that
 | only contested in the canton of Ticino. PARTY I (Geneva
 | Citizens' Movement, MCG) is a regional electoral party that only
 | contested in the canton of Geneva. Because both parties play an
 | important role in the respective canton, these parties are
 | assigned alphabetical codes.

| Data are unavailable for F3018_ (Party Likability) and F3019_
 | (Leader Likability) for SWITZERLAND (2023).

| Collaborators advise that the Swiss election studies
 | traditionally include propensity to vote questions (PTV) rather
 | than party likability. Users interested in the PTV variables are
 | referred to the Swiss Election Study (Selects).
 | Further, unlike previous Swiss studies included in CSES, the 2023
 | study does not include leader likability items. This marks a
 | departure from previous procedures, but collaborators note that
 | previous likability questions focused on members of the
 | government (Federal Councillors), who do not play an important
 | role in Swiss elections. While such leader likability questions
 | were rarely analyzed by Swiss political scientists, they were
 | sometimes included in comparative work and treated as equivalent
 | to party leader ratings, which might have been misleading.

| LEADER A (Recep Tayyip Erdogan) and LEADER B (Kemal Kilicdaroglu)

were the Presidential candidates of their respective parties/ coalitions in the 2023 Presidential Election.

PARTY C (Sinan Ogan) contested the 2023 Presidential elections as independent candidate. Data for him and PARTY D (Homeland Party) are unavailable for F3018_, F3019_, and F3020_. However, macro data are available for PARTY C and D, which is why they were assigned an alphabetical code.

PARTY F (Nationalist Action Party), PARTY G (Good Party), PARTY H (Peoples' Equality and Democracy Party) and PARTY I (New Welfare Party) did not nominate candidates for the Presidential elections, but contested in the 2023 parliamentary election. They were assigned an alphabetical code because relational data is available for them in F3018_, F3019_ and F3020_.

PARTY H contested the 2023 elections as Party of Greens and the Left Future (YSP). However, the party was rebranded as Peoples' Equality and Democracy Party (DEM Parti) in October 2023.

LEADER H Cigdem Kilicgun Ucar/Ibrahim Akin refers to the co-chairs of PARTY H (Party of Greens and the Left Future) held by Cigdem Kilicgun Ucar and Ibrahim Akin. Respondents were asked to rate both of them jointly for F3018_H. Collaborators note that both leaders are of equal importance.

Four alliances formed in the 2023 Turkish general election. Alliances are listed below and the numerical classification of alliances are arbitrary and denoted by CSES for the ease of users. Where applicable, an * indicates the dominant member(s) of the alliance.

ALLIANCE 1 (The People's Alliance) with the following parties contesting as part of this alliance:

))) PARTY IDENTIFIERS FROM OTHER COMPARATIVE STUDIES

=====

For all parties/coalitions that are assigned an alphabetical classification in CSES MODULE 6, CSES provides identifiers from four other comparative

projects, namely the Manifesto Research on Political Representation (MARPOR, formerly the Comparative Manifesto Project, CMP) Project, the Parliament and Government (ParlGov) Database, the Chapel Hill Expert Surveys (CHES), and the Party Facts Database.

Below, we list the identifiers assigned by each project to a party/coalition included in CSES MODULE 6 and which have been assigned an alphabetical classification. This allows for data bridging between CSES MODULE 6 and these datasets at the party/coalition level.

Data are listed in CSES Codebook Part 3 only for polities and parties/coalitions where information is available in the accompanying dataset. When unavailable for a polity or party/coalition, this is listed in the CSES MODULE 6 dataset as "999999. NOT AVAILABLE IN MANIFESTO RESEARCH ON POLITICAL REPRESENTATION PROJECT" or "9999. NOT AVAILABLE ..." for all other projects. In the documentation below, when data is unavailable for a particular party/coalition in a polity/study where data is mostly available, it is listed as "999999" or "9999". In cases where data is unavailable for all parties/coalitions for a particular polity/study, there is no corresponding documentation entry below.

Polities are listed in alphabetical order. Parties/coalitions are listed in order of their A-I assignment in each polity. In circumstances where there are multiple elections that are included in MODULE 6 for one polity, parties/coalitions are first listed according to alphabetical assignment for the first election study in question.
