

COMPARATIVE STUDY OF ELECTORAL SYSTEMS (CSES) - MODULE 6 (2021-2026)

CODEBOOK PART 4: PRIMARY ELECTORAL DISTRICTS

SECOND ADVANCE RELEASE - DECEMBER 16, 2025

CSES Secretariat
www.cses.org

HOW TO CITE THE STUDY:

The Comparative Study of Electoral Systems (www.cses.org). CSES MODULE 6
SECOND ADVANCE RELEASE [dataset and documentation]. December 16, 2025
version. doi:10.7804/cses.module6.2025-12-16.

These materials are based on work supported by the American National
Science Foundation (www.nsf.gov) under grant numbers SES-1760058 and
SES-2214278, the GESIS - Leibniz Institute for the Social Sciences,
the University of Michigan, in-kind support of participating election
studies, the many organizations that sponsor planning meetings and
conferences, and the numerous organizations that fund national
election studies by CSES Collaborators.

Any opinions, findings and conclusions, or recommendations expressed
in these materials are those of the author(s) and do not necessarily
reflect the views of the funding organizations.

))) CSES ADVANCE RELEASE - WHAT USERS NEED TO KNOW

This dataset and all accompanying documentation is the "Second Advance Release" of CSES Module 6 (2021-2026).

An Advance Release is a preliminary version of this CSES product. It thus lacks some of the checking, cleaning, processing, documentation, data, and variables that we anticipate in the Full Release of this product. The product is still in development, and data will be added gradually. Many election studies and variables that will eventually be present in the CSES Module 6 Full Release are unavailable in this file. Advance Releases are provided as a service to the CSES user community for those analysts who find it valuable to work with preliminary versions of the dataset.

Users should anticipate future changes and improvements to the naming, data, and documentation of variables and election studies that appear in an advanced release file. If users wish to re-use their programming syntax/code on a future release of this product, we recommend that the code be written to accommodate these potential changes.

Users of the Advance Release may also wish to monitor the errata for CSES Module 6 on the CSES website to check for known errors that may impact their analyses. To view errata for CSES Module 6, go to Data Download on the CSES website, navigate to the CSES Module 6 download page, and click on the Errata link in the white box to the right of the page.

We hope that until the Full Release of CSES Module 6 is available, users will find this and future CSES Module 6 Advance Releases helpful in their work.

))) CSES DESIGN, DOCUMENTATION, & WEIGHTS - ADVICE TO USERS

We recommend that researchers become familiar with the CSES design, units of analysis, documentation, and dataset weights before beginning their investigations. For instance, while the set of respondents appearing within each election study represents their respective nations, the group of nations that appear within CSES is not a random sample of countries worldwide. Furthermore, while many election studies include 1,000 or so respondents, other election studies may consist of over 10,000 respondents. Some nations will have studies of more than one election in a CSES module, and occasionally there will be two independent studies of a single election. Last, some election studies include over samples of specific sub-populations or would otherwise benefit from use of the included weight variables. We hope you find our website and documentation useful as you proceed with your work, and welcome any questions or suggestions you have.

))) LIST OF TABLES IN CODEBOOK PART 4

Below, we list the Tables located in CSES Codebook Part 4. Tables can be accessed in the electronic version of the CSES Codebook by searching for "+++".

- TOTAL NUMBER OF ELECTORAL DISTRICTS PER POLITY AND TOTAL NUMBER OF ELECTORAL DISTRICTS REPRESENTED IN CSES DATA

))) OVERVIEW OF "CODEBOOK PART 4: PRIMARY ELECTORAL DISTRICTS"

Part 4 of the CSES Codebook presents the primary electoral districts by polity, which refer to the constituency/riding/district in which an individual respondent in a survey votes. These value labels refer to coders reported in variable F2019 "PRIMARY ELECTORAL DISTRICT" detailed in CSES Codebook Part 2.

These districts are sometimes identified "indirectly," through postal codes, etc... by the CSES Secretariat with the assistance of the national Collaborators. Where postal codes, etc., were ambiguous, cases are coded missing. Wherever possible, CSES uses the labels used by each country's electoral commission.

Only districts where respondents are in the CSES data are listed (see second column of Table below). Polities are listed in alphabetical order.

+++ TABLE: TOTAL NUMBER OF ELECTORAL DISTRICTS PER POLITY AND TOTAL NUMBER OF ELECTORAL DISTRICTS REPRESENTED IN CSES DATA		
POLITY (ELEC YEAR)	Total number of Electoral Districts in Polity	Total number of Electoral Districts in CSES (% coverage)

		of total N Districts)

AUSTRALIA (2022)	151	151 (100%)
BRAZIL (2022)	27	27 (100%)
DENMARK (2022)	10	10 (100%)
FRANCE (2022)	1	1 (100%)
MONTENEGRO (2023)	1	1 (100%)
NEW ZEALAND (2023)	72	72 (100%)
NORTH MACEDONIA (2024)	6	6 (100%)
POLAND (2023)	41	41 (100%)
PORTUGAL (2022)	22	17 (77%)
PORTUGAL (2024)	22	14 (64%)
SLOVAKIA (2023)	1	1 (100%)
SWEDEN (2022)	29	29 (100%)
SWITZERLAND (2023)	26	26 (100%)
TAIWAN (2024)	73	40 (55%)
TURKIYE (2023)	87	54 (62%)
UNITED STATES (2024) *	51	51 (100%)

District data are unavailable for AUSTRIA (2024) and SLOVENIA (2022).

* = For the United States, district data refers to the 2024 Presidential elections, where an electoral college system is used and sees the Presidential candidate who wins in a state awarded its electoral college votes (except for Maine & Nebraska where electoral votes are awarded on the basis of who wins congressional districts within the state). Hence, district data refers to state level data (50 states + the District of Columbia).

))) HOW TO NAVIGATE THE CSES MODULE 6 CODEBOOK

In the CSES MODULE 6 dataset, all variables begin with the letter "F" (F being the sixth letter of the English alphabet and thus signifying MODULE 6).

The CSES Codebook is especially extensive and users are advised that the best way to navigate it is electronically. It is a .txt format which allows it to be accessed via a variety of programs.

The CSES Codebook can be navigated quickly in the electronic files, with the following commands allowing for quick searching:

))) = Section Header

>>> = Sub-section Header 1

<<>> = Sub-section Header 2

+++ = Tables

CSES QUESTION CLASSIFICATION = For survey level variables only, CSES Question Classification details whether the variable is part of the CSES Core component, which are questions asked repeatedly in CSES Modules, whether a variable is part of the CSES Module Theme component, which are questions specific to the Module Theme under exploration and might not be included in CSES repeatedly, or whether a variable is a Derivative Variable, which is explained below.

VARIABLE NOTES = Notes for particular variables

ELECTION STUDY NOTES = Notes for a particular election study

DERIVATIVE VARIABLE = Highlights a variable derived from another variable or variables within the CSES.

POTENTIAL POLITY LEVEL BRIDGING IDENTIFIER =
 Highlights a variable that may be used for data bridging at polity level.

POTENTIAL REGIONAL LEVEL BRIDGING IDENTIFIER =
 Highlights a variable that may be used for data bridging at regional level.

POTENTIAL TIME BRIDGING IDENTIFIER =
 Highlights a variable that may be used for data bridging by time.

POTENTIAL PARTY/COALITION LEVEL BRIDGING IDENTIFIER = Highlights a variable that may be used for data bridging at party/coalition level.

POTENTIAL CSES PRODUCT BRIDGING IDENTIFIER = Highlights a variable that may be used for data bridging with other CSES products.

For further details on the CSES MODULE 6 documentation, users are advised to consult Part 1 of the CSES Codebook.

| ELECTION STUDY NOTES - UNITED STATES (2024): PRIMARY ELECTORAL
 | DISTRICTS

| District data given in F4001-F4007 refer to the U.S. 2024
 | Presidential elections which follow state-level divisions. Listed
 | above in addition to the state is the congressional district
 | within the state (E.g., 02706 refers to the state of Minnesota
 | and the sixth congressional district in Minnesota - MN06).
 | For Presidential elections, the United States use an electoral
 | college system, a system which sees the Presidential candidate
 | who wins in a state awarded its electoral college votes (except
 | for Maine and Nebraska, where electoral votes are awarded on the
 | basis of who wins congressional districts within the state).
 | Hence, the first three digits of electoral district codes above
 | refer to the state the respondent resided in.
 | Together with the first three digits, the last two digits
 | specify Congressional Districts, which are also listed
 | after the state name.
 | U.S. states, the geographical level F4001-F4007 refer to, are
 | provided in F2018 (REGION OF RESIDENCE).
