MODULE 6 (2021-2026)
QUESTIONNAIRE

- January 25, 2022 -

=====

COLLABORATOR INSTRUCTIONS FOR THE ADMINISTRATION OF THE CSES QUESTIONNAIRE:

- (1) Following these collaborator instructions, this document is comprised of three sections:

))) CSES MODULE 6 QUESTIONNAIRE: ADMINISTRATIVE VARIABLES

The "Administrative Variables" section is a list of common administrative variables that, if possible, should be provided at the time data are deposited with the CSES Secretariat.

))) CSES MODULE 6 QUESTIONNAIRE: CSES MODULE

This is the CSES Module itself, a common module of survey questions for researchers to include in their national post-election survey. The CSES Module is intended to be administered exactly as it is specified in this document.

))) CSES MODULE 6 QUESTIONNAIRE: DEMOGRAPHIC VARIABLES

Collaborators are asked to provide data on background (demographic) characteristics of respondents, coded to an agreed upon set of standards as indicated in this section. There is great international variation in the ways that collaborators will go about soliciting information on the background characteristics of their respondents. The objective here is not standardization of the way collaborators ask these background questions, but instead, standardization to a common, cross-national scheme for coding each variable.

- (2) The CSES Module (consisting of the questions which are named beginning with the letter "Q") is intended to be administered in its entirety as a single, uninterrupted block of questions, unless noted otherwise for particular questions. In most cases, the CSES Module is included as part of a larger study. For reliable comparisons to be made, it is important that any additional items investigators may wish to include do not interrupt the CSES Module.
- (3) The CSES module should be administered as a post-election

interview.

- (4) Where the CSES module is included in a larger study, to ensure that question-ordering effects are minimized, collaborators should be sensitive to the effects questions asked immediately prior to the module may have.
- (5) NOTES often precede the question TEXT, and provide instructions for the administration of the item. Where no question TEXT is provided, collaborators should provide documentation of the question used.
- (6) Showcards may be helpful for the administration of some questions. For this reason, a Respondent Booklet is available for download from the CSES website. The Respondent Booklet contains showcards for select questions. It is indicated in the NOTES when a showcard is available for a question.
- (7) The response options that should be read to the respondent are contained in the body of the question TEXT.
- (8) Where lower-case words appear in brackets [] collaborators should select the words that are most appropriate.

For example:

[party/presidential candidate]

...indicates that either the word "party" or the phrase "presidential candidate" should be read, but not both.

- (9) Where upper-case words appear in brackets [] collaborators should substitute the words that are most appropriate.

For example:

[COUNTRY]

...should be replaced with the name of the country where the election was held (perhaps "Canada" or "the Philippines").

Another example:

[NUMBER OF YEARS BETWEEN THE PREVIOUS AND THE PRESENT ELECTION OR CHANGE IN GOVERNMENT]

...should be replaced with a number that indicates the amount of years that have passed between the previous election and either the current election or recent change in government.

- (10) Phrases that appear in parentheses () contain words that are optional - that collaborators (or their interviewers) can decide to read or not read to respondents as needed.
- (11) Words in question text that are in upper-case but NOT within brackets [] should be emphasized by the interviewer when reading the question text.

For example, the word "COUNTRY" would be emphasized in the following question when the interviewer reads the question to the respondent:

What COUNTRY do you live in?

But in this next example, the interviewer does not emphasize the word "[COUNTRY]". Instead, this is an instruction for the collaborator to substitute the name of the respondent's country into the question text (for more information, see the eighth Collaborator Instruction above):

How long have you lived in [COUNTRY]?

- (12) Interviewer instructions are available for some questions. These interviewer instructions, labeled as HELP, are intended to provide advice to the interviewers to assist in administering the question. It is also useful to discuss the interviewer instructions as part of interviewer training. The interviewer instructions, where available, appear after the question TEXT. In interviewer-administered surveys, interviewer instructions should be available to the interviewer, but not to the respondent. For example, in a computer-assisted interview, the interviewer instructions might appear on the screen in a special color, and interviewers trained to make use of those instructions as necessary, but the interviewer should NOT read the interviewer instructions to the respondent.
- (13) Some response options are followed by an arrow (->) and a skip pattern instruction. If the respondent selects that response option, the skip pattern instruction after the arrow is to be executed.
- (14) Respondents who volunteer the response "DON'T KNOW" (or who have REFUSED to answer a question) should be coded as such. Interviewers should accept these responses and should NOT probe for additional information or force a respondent to use one of the response options provided in the text of the question.
- (15) Special care should be taken in the administration of the Vote Choice items (Q10 and Q14 question series).

Wording for the Q10 and Q14 question series, which is to record vote choice in the elections, should follow national standards.

Collaborators are invited to compare their own national instrument with other instruments of countries that are part of the CSES and look for convergence where this is possible.

For Q14 (previous election), ask about the previous national election of the same type (whether legislative or presidential). For countries where more than one institution is being currently elected on the same day (e.g., president and legislature), please consider asking about the previous lower house election if votes have been recorded for the current lower house election.

For Q10 (current election), for countries where more than one

institution is elected on the same day (e.g., president and legislature) using different votes, please ensure that all votes are supplied. Consider including all national elections having been held within three months before the study's data collection period.

Please ensure all vote choices are supplied as separate variables in the dataset that you deposit.

For countries where voters have two votes for the same institution (e.g. parallel and mixed member proportional systems; double ballot systems), please ensure that both/all votes are supplied.

For countries using preferential systems (e.g., STV, AV) please provide first and second preference vote.

- (16) For questions asking about parties, collaborators should be advised that they may add one or several party blocs to a list of individual parties if they feel that it will be difficult for respondents to recognize individual parties.

))) CSES MODULE 6 QUESTIONNAIRE: ADMINISTRATIVE VARIABLES
=====

NOTES: The "Administrative Variables" section is a list of common administrative variables that, if possible, should be provided at the time data are deposited with the CSES Secretariat.

All items in this section begin with the letter "A".

A1. >>> ID COMPONENT - RESPONDENT WITHIN ELECTION STUDY

NOTES: This item should provide a unique, numeric identification code for each respondent in the study.
.....

A2. >>> INTERVIEWER WITHIN ELECTION STUDY

NOTES: This item should provide a unique, numeric identification code for each interviewer who administered the survey.

Q02a. >>> MEDIA USAGE: WATCH NEWS ON A PUBLIC TELEVISION BROADCASTER

NOTE: If necessary, you may include in the question named examples of public television broadcasters for your country and election. For example:
"Watch the news on a public television broadcaster such as [BROADCASTER 1] or [BROADCASTER 2]?"

For the purpose of this question, "Public broadcasters" are broadcasters controlled by public agencies or the state. They are usually funded through license fees or other kinds of audience contributions or from the state budget; sometimes they also generate funding by running advertisements. If the term "public broadcaster" is not common in your country and likely to be misunderstood by respondents, please use the term you consider most appropriate; often this may be the term "state television".

Since in most countries only one or at best a small number of broadcasters are run as public or state broadcasters, please mention the names of all that exist in your country. Please include a brief explanation of the wording you chose for this question in the documentation of your dataset.

If your media system has distinct public national, regional and/or local broadcasters please refer to those that are the most important ones as sources of news about national elections.

Please note that what counts for this question is the broadcaster as source of news, regardless of whether its newscasts are viewed on television sets, online, or via apps.

.....

TEXT: In the next questions, we would like to know what kind of media you used to follow news about parties and candidates during the recent election campaign. We begin with the traditional media of television, radio and newspapers, but regardless of whether you use these media in the traditional ways or online.

During the recent election campaign, in a typical week, how many days did you:

Watch the news on a public television broadcaster?

.....

HELP: Interviewer instruction: If the respondent says 'every day' please ask them for a number of days.

 Q02b. >>> MEDIA USAGE: WATCH NEWS ON A PRIVATE TELEVISION BROADCASTER

NOTE: If necessary, you may include in the question named examples of commercial television broadcasters for your country and election. For example:
 "Watch the news on a private television broadcaster such as [BROADCASTER 1] or [BROADCASTER 2]?"

For the purpose of this question, "private broadcasters" are commercial broadcasters run by private companies and funded by advertisement and/or subscription revenues.

Collaborators can use either the term "private television broadcaster" or "commercial television broadcaster" in the question text - whichever is likely to be most understood by respondents in your data collection.

To clarify the meaning of this category to respondents, please refer to the names of those private television broadcasters in your country that are the most important ones among private broadcasters as sources of news about national elections.

If your media system has distinct private national, regional and/or local broadcasters please refer to those that are the most important ones as sources of news about national elections.

Please note that what counts for this question is the broadcaster as source of news, regardless of whether its newscasts are viewed on television sets, online, or via apps.

NOTES: In studies of parliamentary elections, ask about the government. For "in [CAPITAL]" substitute the name of the capital of the country where the election was held.

In studies of presidential elections, ask about the president.

As appropriate, collaborators can instead ask about "the government of [the incumbent prime minister]".

For example, for a presidential election study in an imaginary country with capital "XYZ", where the last election was five years ago and the president prior to the election was female, the question would read:

"Now thinking about the performance of the president in general, how good or bad a job do you think the president in XYZ has done over the past five years? Has she done a very good job? A good job? A bad job? A very bad job?"

When substituting a number for the phrase "[NUMBER OF YEARS SINCE LAST GOVERNMENT TOOK OFFICE, BEFORE THE CURRENT ELECTION]" please ignore interim/caretaker governments.

NOTES: In most national contexts, the left-right dimension will be the single best ideological summary of the current issue conflicts in a society. Where this is known not to be the case, a more pertinent dimension of ideological conflict (like the independence-integration dimension in Taiwan) might be used in addition to the left-right placement scales.

So where left-right is not considered meaningful/important/widely understood, IN ADDITION TO ASKING THE LEFT-RIGHT QUESTION, the collaborator has the option of also administering a second scale (of 11 points: 0-10) which is thought to best summarize the main ideological division in the country.

))) CSES MODULE 6 QUESTIONNAIRE: DEMOGRAPHIC VARIABLES

=====

NOTES: Collaborators are asked to provide data on background (demographic) characteristics of respondents, coded to an agreed upon set of standards as indicated in this section. There is great international variation in the ways that collaborators will go about soliciting information on the background characteristics of their respondents. The objective here is not standardization of the way collaborators

ask these background questions, but instead, standardization to a common, cross-national scheme for coding each variable.

 D17. >>> REGION OF RESIDENCE

NOTES: This variable reports the respondent's region of residence
 using coding categories not more detailed than the autonomous
 regions in Spain, or the Laender in Germany. Regions are usually
 (but not always) based upon the social, cultural, or historical

differences (though some correspond to administrative regions) that manifest themselves in political cleavages.

D18. >>> PRIMARY ELECTORAL DISTRICT

NOTES: This item should indicate the respondent's primary electoral district.

Wherever possible, this variable should use official district identification numbers.

The goal of this variable, wherever possible, is to identify electoral constituencies, the definition of which is "the smallest unit for which there is representation to the national parliament." In other words, the point at which votes are translated into seats.
